

## WALL MOUNTED PROJECTOR SHELVING

Vibration-free glass shelving for audio-visual equipment

### DESIGN BRIEF

Wall Mounted Projector Shelving provides practical, vibration-managed support for projectors and other conference room audio-visual equipment. Glass and stainless steel shelving provides technically-advanced support for delicate wall-mounted equipment and is designed to give you great performance. This stylish, high-performance audio-visual storage solution from Futureglass features engineered components and an innovative vibration-deadening fixture to optimise audio and visual performance.

Wall Mounted Projector Shelving is designed in the UK by glass furniture specialists who really understand sound and vision. To manage vibration, Wall Mounted Projector Shelving features vibration-minimizing fixtures at the interface between wall and shelf, which helps to optimise

performance. You can use this versatile wall-mounting unit as a high-performance alternative to ceiling mounting for components such as projectors.

Like other audio-visual storage from Futureglass, Wall Mounted Projector Shelving offers an innovative solution that isn't just technically advanced; it's also great to look at. The stainless steel and glass components create a minimal appearance and the cleanest lines of any home entertainment shelving solution on the market. This space-saving contemporary design looks great in any conference room.

The larger shelf style is designed for strength, performance and style using toughened 10 mm safety glass to BS 6206A, with stainless steel components to give optimum support to your components. You'll find Wall Mounted Projector Shelving is easy to install and you

can attach it to a solid wall in just minutes to create a versatile storage solution. The wire loop retaining system makes it easy to level shelves, even if the brackets are not installed perfectly level.

Wall Mounted Projector Shelving, like other glass contract furniture from Futureglass, is a superb example of contemporary British design, manufactured in the UK.

### CHOOSE YOUR OPTIONS

Wall Mounted is available as a standard unit in a choice of five sizes. You can also choose frosted glass for the shelves.

### CUSTOMISE... DIFFERENT SIZES, COLOURS

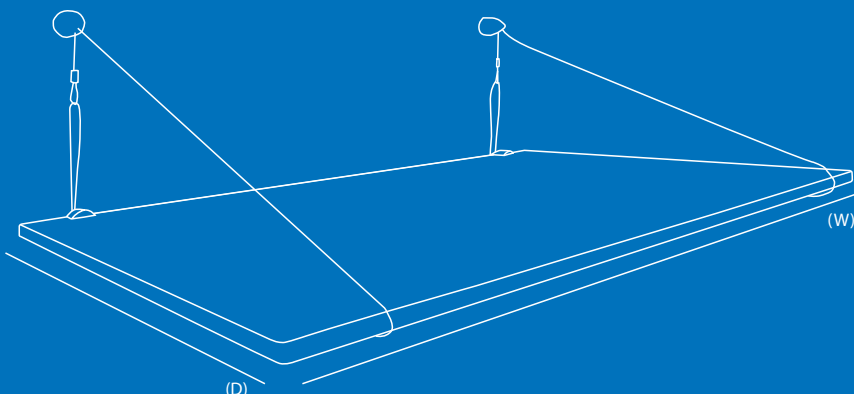

If you want even more choice, we can customise GEM Home Cinema units with different sizes, sizes, colours, finishes or materials.
